

2013 JOINT POSITION STATEMENTS

The Alaska Council of School Administrators (ACSA) Serves as an umbrella for four of Alaska's premier educational leadership organizations, including:

- Alaska Association of Elementary School Principals
- Alaska Association of Secondary School Principals
- Alaska Association of School Administrators
- Alaska Association of School Business Officials

David Herbert
President, ACSA
St. Mary's School District

Robert Thomason
President, AASA
Petersburg City Schools

Adam Mokolke
President, AASSP
Burchell High School

John Pothast
President, AAESP
Redoubt Elementary School

Laurie Olson
President, ALASBO
Kenai Peninsula Schools

CORE PURPOSE

Professional education leaders' forum and
advocacy for public education

INTRODUCTION: SERVING ALL ALASKA'S CHILDREN

The Alaska Council of School Administrators (ACSA), representing principals, business officials and superintendents, embraces its partnership with PreK-12 education with a conviction that all children and their families will find public education a rewarding experience. ACSA members recognize, and take their responsibility seriously, that our state's future depends on all children receiving a meaningful education where all graduates are college or job ready. As such, the public education community must embrace innovation and encompass meaningful accountability.

ACSA members are committed to an education system that best serves the interests of all children. Advocacy will be undertaken with openness to proven research-based strategies and systemic changes necessary to advance public education; meaningful partnerships with families and communities; and support rigorous accountability for the well-being of the whole child, including student academic achievement.

Each year ACSA members convene to formulate joint position statements to guide their legislative advocacy in support of children. We look forward to collaboration with other like-minded organizations, the Alaska State Legislature and United States Congress to advance public education in several areas:

- Adequate Funding
- Early Childhood Education
- Career and Technical Education
- Preparing, Attracting and Retaining Qualified Educators
- Prior Year PERS Retirement Billings
- ESEA Re-Authorization
- Secure Rural Schools & Community Self-Determination Act
- Worker's Compensation Fee Schedule

ADEQUATE FUNDING

ACSA strongly encourages the Legislature to ensure adequate operational and infrastructure funding for school districts. Without adequate funding support, school districts cannot deliver the quality education services required by Alaska's students, citizens and the State Constitution.

- Enable effective planning by adopting a multi-year foundation funding plan early in the session. Increases in funding are needed to deal with persistent inflationary pressures in energy costs, payroll, benefits and transportation.
- Fund capital projects to provide safe and high quality learning environments statewide, through the Capital Improvement Projects program, the Bond Debt Reimbursement program, the Rural School Construction fund and the General Obligation Bond program.
- Continue to support broadband infrastructure by increasing speed and shortening delays of data transfer across the Internet in order to facilitate reliable and equitable delivery of valuable educational opportunities for students throughout Alaska.
- Provide full funding of any new initiatives that require districts to provide additional services.
- Reduce the hold harmless funding formula trigger from five percent (5%) of Average Daily Membership (ADM) to two and one-half percent (2.5%), to mitigate the negative educational impact of a sudden drop in student enrollment.
- Develop a long-term, comprehensive approach to increase available state funding for education to ensure a quality education for all students and to support the ongoing economic vitality of our state.

EARLY CHILDHOOD EDUCATION

ACSA believes early childhood education should be a priority for all Alaskans who desire to increase and improve educational opportunities for all children, and it supports the funding of programs that will offer early education opportunities.

- Research is clear and consistent that the benefits of early childhood education are significant and important to the educational development of young people.
- A reliable system of funding for early childhood education programs is not available for all of Alaska's schools and families.
- The children most impacted by the lack of funding for early childhood education are those without access to alternate educational programs.

CAREER & TECHNICAL EDUCATION

ACSA supports adequate and equitable funding for Career and Technical Education (CTE) in order to ensure K-12 students have access to the tools, training, and programs to prepare a future workforce for Alaska. Educational leaders need to be involved in the process of identifying existing rural and urban programs for improving and expanding workforce development opportunities for our children.

- We are appreciative of the additional funding in FY12 and FY13; however, continued investment is necessary to fully implement the statewide plan for CTE, coordinated by the Alaska Department of Education and Early Development.
- Reengaging disenfranchised students in all grades through expanded CTE programs, including career and technical student organizations, and exposure to career pathways, will assist educators in increasing graduation rates and reducing the dropout rate for Alaska's children.
- A strong, well-articulated CTE model in both rural and urban school districts is integral to supporting high K-12 educational standards and Alaska's economic growth and stability.
- CTE professional development is critical to ensure teachers can provide for the variety of students' interests and the full range of industry demands which require content mastery as well as industry-based credentials and ongoing training.

PREPARING, ATTRACTING & RETAINING QUALIFIED EDUCATORS

ACSA encourages the development of a comprehensive state-wide program to prepare, attract and retain quality educators in our schools.

- The Alaska university system does not graduate enough students in teacher education, administration, and related services areas to meet school districts' staffing needs.

- Living conditions in remote areas and the higher cost of living in many Alaskan communities present challenges for teachers and administrators, making it difficult to attract and retain qualified teachers and administrators.
- Compensation packages in many states exceed Alaska's salaries and benefits for teachers and administrators, especially when factoring in Alaska's higher cost of living.

PRIOR YEAR PERS RETIREMENT BILLINGS

ACSA recommends that the legislature take action to revise the provision in AS 39.35.255 that requires an FY08 funding baseline for all future PERS retirement payments.

- The calculation mandated in AS 39.35.255 references a single base year, FY08 that unfairly penalizes employers with unusually high FY08 PERS payroll for one-time special projects such as construction.
- In the long-term, the FY08 baseline will discourage employers from adopting the most efficient staffing plans, which may include part-time staffing and other efficiency measures such as out-sourcing.
- The unintended consequences of AS 39.35.255 are particularly challenging for school districts and municipalities, many of which are already experiencing population loss and declining revenues from various sources.
- Districts that have paid the assessment in FY12 should have the funds refunded, or otherwise forgiven.

ESEA REAUTHORIZATION

ACSA calls upon Congress to complete the reauthorization of the Elementary and Secondary Education Act in 2013 and in doing so, restore state discretion on best approaches to bring about meaningful student achievement improvement. If Congress fails to act, all sanctions and other punitive measures should be suspended until a formal reauthorization occurs.

The reauthorization of ESEA should include:

- Establishing state initiated accountability systems that evaluate students, schools, teachers and principals based on multiple and varied indicators.
- Establishing state developed growth models that provide realistic targets for individual schools and students.
- Differentiating between "chronically failing" schools and schools making progress but may miss targets in only one or a few categories.
- Emphasizing capacity building within schools and districts rather than punishment.
- Ensuring that efforts to turnaround "failing" schools and districts include options beyond staff replacement and school closures, but rather provide supports and avenues to build on successful steps towards proficiency for all students.
- Placing the highest priority on maintaining quality public schools for all children.
- Returning responsibility for improving student learning to the state level while maintaining the highest priority on supporting quality public schools for all children.
- Ensuring that efforts to improve Alaska's lowest performing schools and districts include state directed turnaround options that fit the uniqueness of each school and/or district.

SECURE RURAL SCHOOLS & COMMUNITY SELF-DETERMINATION ACT (FOREST RECEIPTS)

ACSA endorses the continuation of the 100+ year partnership that was created between the Federal government and rural communities to compensate counties affected by the placement of timber into federal ownership. This partnership stipulates that 25% of the revenue derived from U.S. Forest Service activities, e.g., timber sales, mineral extraction and grazing fees, be returned to impacted counties. In 2000, Congress passed the Secure Rural Schools and Community Self-Determination Act (SRSCA) to help ensure that the partnership was honored, legislation that expired on September 30, 2011 and was extended by one year on June 29, 2012.

- If SRSCA is not reauthorized, funding for the program will decrease from \$440 million to \$62.5 million. For Alaska, SRSCA funding will diminish significantly from \$18.5 million in FY12 to only \$518,000 in FY14.
- SRSCA is critically important to 24 of Alaska's 54 school districts (44% of all districts), which have relied heavily on SRSCA funds to supplement local funding for education. Without positive action, 24 Alaska school districts and the communities encompassing these districts will lose \$18 million in revenue resulting in significant community and district job loss, education program reductions, and major overall economic upheaval. In at least one single site school district, 25% or more of the district's revenue would be lost.
- The Alaska Council of School Administrators urges Congress and the Alaska legislature to join together to support this partnership and Alaska's future.

WORKER'S COMPENSATION FEE SCHEDULE

ACSA asks that the legislature take action to return to the historical method of setting a fixed fee schedule for allowable medical fees in workers' compensation claims. Implementation of HB 13 in 2011 (codified in AS 23.30.097(a)(1)), which tied payments to "usual, customary, and reasonable fees" (UCR) has already resulted in rate increases averaging 10% for the current fiscal year.

- Alaskan employers currently pay the second highest rates in the country for workers' compensation coverage (Montana leads), straining resources.
- Payments for medical expenses now make up 76% of the amount paid for workers' compensation claims in the state.
- Medical costs have increased approximately 46% for the same service due to implementation of this bill according to studies by the Alaska Public Entity Insurance Corporation, AMLJIA and the state Division of Risk Management.
- Research by the National Council on Compensation Insurance shows that states without workers' compensation fee schedules have higher medical costs. The most effective fee schedules set a maximum allowable fee tied to Medicare reimbursement rates.
